This pdf might be well worth a study, and a lot better than other. It really is simplistic but excitement inside the fifty percent in the book. Its been printed in an exceedingly straightforward way which is just after i finished reading this ebook through which really modified me, modify the way i believe. (Derick Brekke)

F.A. Davis Company, 2007. Book Condition: New. Brand New, Unread Copy in Perfect Condition. A+ Customer Service! Summary: The road to nursing success begins here! A complete review of core concepts. More than 1,150 classroom-tested, NCLEX-style questions. (Alternate format, too!) Test-taking hints and rationales for correct and incorrect answers. TWO BOOKS IN ONE! Course review now. NCLEX-prep later. 1,150 critical thinking questions (both multiple choice and alternate format) organize the seemingly huge volume of pharmacology information students must master into manageable sections divided by body systems and specific diseases. They not only learn to associate the medication with the disease process, making learning easier, but are also able to evaluate their knowledge of medications prior to taking their exams. All of the questions encompass the basic concepts for medication administration, including why the client is taking the medication * when the nurse would question administering the medication * how the nurse knows the medication is effective * and what interventions the nurse needs to teach the client concerning the medication. "I love that the questions come with rationales and that the books are filled with relevant questions! Tons of people in my class use them and without fail we rave about them after each test!"--Taryn Van Rensburg, Student Nurse at Naugatuck Valley Community College, CT.
