Springer. Paperback. Book Condition: New. Paperback. 446 pages. Dimensions: 9.2in. x 6.2in. x 1.1in. The Seventh International Conference on Mathematical Methods for Curves and Surfaces took place June 26–July 1, 2008, in Tnsberg, Norway. The earlier conferences in the series took place in Oslo (1988), Biri (1991), Ulvik (1994), Lillehammer (1997), Oslo (2000), and Troms (2004). The conference gathered 165 participants from almost 30 countries who presented a total of 129 talks. This includes nine invited talks and seven mini-symposia. This book contains 28 original articles based on talks presented at the conference.

The topics range from mathematical analysis of various methods to practical implementation on modern graphics processing units.

The papers reflect the

newest developments in these fields and also point to the latest literature.

The

papers have been subject to the usual peer review process,

and we thank both

the authors and the reviewers for their hard work and helpful collaboration.

We wish to thank those who have supported and helped organize the conference.

ence.

First and foremost it is a pleasure to acknowledge the generous financial support from the Department of Informatics and the Centre of Mathematics for Applications (CMA) at the University of Oslo, and the Research Council of Norway.

We would also like to thank Andrew McMurry for his help with

technical matters,

and Sara Mrken for help with the registration. November 2009 The Editors Organization Organizing Committee and
